nguyenduc345345@gmail.com

linkedin.com/in/hiengamedev

Tang Nhon Phu, Ho Chi Minh

Skills

Unity

Good at C#, OOP, Design patterns, data structures, and algorithms

Troubleshooting & problem-solving skills

Git, AI-assisted Coding (e.g., Claude)

Education

Information Technology

2020 - 2024

Ho Chi Minh City University of Technology and Engineering

Participated in academic competitions and Hackathons during university.

Interests

Playing badminton and gaming.

Career Objective

To further develop my expertise in mobile game development and grow toward a Lead position, contributing to scalable systems, mentoring team members, and driving product success through data-driven decisions.

Experience

Game Developer **07/2023 - Present**

IMBA Games

- Develop and optimize gameplay features for Hybrid Casual mobile games
- Independently capture and produce CPI marketing videos for prototype games.
- Design and implement core mechanics that are simple, addictive, and scalable.
- Built and deployed games for both Android and iOS platforms.
- Optimize game performance (FPS, memory usage, loading time) across various mobile devices.
- Collaborate closely with Game Designers, Artists, and Marketing teams to rapidly prototype and test new concepts.

Activities

Game Developer **April 2024 - July 2024**

CrazyHub – Product Acceleration Program by CrazyLabs

- Participated in the CrazyHub acceleration program, focusing on developing and testing Hybrid Casual game products.

Projects

Game Developer **July 2025 - August 2025**

State Protector

State Protector is a thrilling tower defense action game where players must protect a moving train from waves of relentless enemies. Developed core gameplay mechanics, enemy AI behaviors, and combat systems using Unity (C#). Implemented performance optimization for mobile platforms and built scalable systems to support future content expansion.
